

Name:

1] Describe three things you learned this week about the Raspberry Pi and/or Google AIY Voice module that you didn't know before. (Be specific.)

2] Describe three things you learned this week about controlling the AIY Voice module using terminal commands and/or Python that you didn't know before. (Be specific.)

3] Describe what you accomplished using the AIY Voice module this week.

4] What did you like most about the class or content this week?

5] What question(s) do you have that still need to be answered? If none, explain how you could extend what you worked on this week even further to make it more interesting, efficient, powerful, useful, or engaging?

Optional] What suggestions do you have to improve the class moving forward?
